DJE - Asien invests primarily in solid companies with promising growth prospects in the Asia-Pacific region. The fund management seeks to identify investments with attractive valuations and shareholder-friendly corporate policies such as capital returns and share buybacks (total shareholder return). The fund allocation is independent from market benchmark and uses decades of experience and in-depth Asian expertise of DJE research team to deliver a positive performance.

The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method<sup>2</sup> and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 0.00%, he has to spend a one-off amount of Euro 0.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges.

As at: 29/02/2024

**MONTHLY COMMENTARY**

The Asian stock markets put in a largely pleasing performance in February. The stock exchanges in China, Japan, Taiwan and South Korea were among the strongest performers. By contrast, the stock exchanges in Singapore and Thailand closed the month with a moderately negative result. The Asian stock markets benefited in part from the positive momentum in the US and European equity regions, partly due to the ongoing enthusiasm surrounding the topic of artificial intelligence and the associated dominance of Asian semiconductor stocks. The "friendshoring" factor is likely to continue to play a role for the Japanese and South Korean markets. In China, on the other hand, the purchasing managers' index for services recovered, while that for manufacturing remained in recessionary territory. The majority of experts expect the annual meeting of the People's Congress at the beginning of March to set a growth target of 5% for 2024, as it did for the previous year, which is likely to be accompanied by stimulus measures in light of the crisis in the property sector. Against this market backdrop, the DJE - Asien rose by 4.21%. The sub-sectors of the Asian investment region showed a positive picture in February. The sectors that performed best in relative terms - i.e. with the smallest price losses - were healthcare (underweighted in the fund), consumer staples (underweighted in the fund) and consumer discretionary (overweighted in the fund). The weakest results came from the financial services (underweight in the fund), energy (underweight in the fund) and construction & materials (overweight in the fund) sectors. Overall, the sector weighting had a positive effect on the fund's price performance compared to the benchmark index. At the individual stock level, the highest performance contributions came from the Japanese semiconductor manufacturer Tokyo Electron, the Chinese e-car company Li Auto and the Taiwanese semiconductor group Taiwan Semiconductor Manufacturing Company. On the other hand, the fund's performance was negatively impacted by the telecommunications company KDDI, the brewery Asahi Group Holding and the trading company Itochu (all three Japan), among others. The fund management made moderate adjustments to the fund's sector allocation. The overweight was increased in the chemicals and property sectors. The overweight in the insurance, consumer goods and industrial goods sectors was reduced. The underweight was reduced in the technology, automotive manufacturers and financial services sectors. The underweight was increased in the telecommunications, food and commodities sectors. At country level, the proportion of Chinese and Taiwanese stocks increased, while the proportion of Japanese stocks fell. The investment ratio fell slightly to 96.58% (previous month: 98.32%). At the end of the month, stocks denominated in Hong Kong dollars were currency-hedged against the US dollar.

Evaluation by MSCI ESG Research

MSCI ESG Rating (AAA-CCC)	A
ESG Quality Score (0-10)	6.8
Environmental score (0-10)	5.5
Social score (0-10)	5.8
Governance score (0-10)	5.2
ESG Rating compared to Peer Group (100% = best value)	59,09%
Peer Group	Equity Asia Pacific ex Japan (682 Funds)
ESG Coverage	85,43%
Weighted Average Carbon Intensity (tCO <sub>2</sub> e / \$M sales)	136.40

ESG Rating	What it means
AAA, AA	<b>Leader</b> The companies that the fund invests in show strong and/or improving management of financially relevant environmental, social and governance issues. These companies may be more resilient to disruptions arising from ESG events.
A, BBB, BB	<b>Average</b> The fund invests in companies that show average management of ESG issues, or in a mix of companies with both above-average and below-average ESG risk management.
B, CCC	<b>Laggard</b> The fund is exposed to companies that do not demonstrate adequate management of the ESG risks that they face, or show worsening management of these issues. These companies may be more vulnerable to disruptions arising from ESG events.
Not Rated	Companies in the fund's portfolio that are not yet rated by MSCI, but these are rated as part of our own analysis.

DJE - ASIEN I (EUR)

INVESTMENT APPROACH

DJE - Asien invests primarily in companies with attractive and promising business models from the Asia-Pacific region. The RCEP free trade zone (Regional Comprehensive Economic Partnership), which was established in 2020, is the largest in the world in terms of its share of global GDP and is expected to contribute to the region's dynamic growth (see chart). The fund allocation is based on our proprietary fundamental top-down (FMM methodology) and bottom-up analysis. We believe that the combination of global macroeconomic analysis along with bottom-up security selection is essential to balance opportunities and risks. The focus of the fund is companies with attractive revenue and earnings growth, stable earnings, potential for innovation and a leading competitive position. The fund management allocates across regions, countries, and sectors of the Asian economic area, independent from any market benchmarks.

DYNAMIC GROWTH REGION ASIA

Source: Weltbank, World Economics As at: 2022

OPPORTUNITIES AND RISKS

- Opportunities
- + Excellent demographic developments make long-term growth in investments in Asia possible
  - + The conditions for expansion in many Asian domestic economies, such as China, continue to exist
  - + Traditionally higher dividend payments mean that the fund can take advantage of the compounding effect of reinvested dividends
- Risks
- Equity prices may exhibit relatively strong fluctuations depending on market conditions
  - Currency risks resulting from a high proportion of foreign investments
  - Issuer country and credit risks

### DJE Kapital AG

DJE Kapital AG is part of the DJE Group, can draw on around 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".
