The Funds are actively managed by DJE and, where a benchmark index is indicated, without reference to it. The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method² and illustrate past development. Past performance is not indicative for future returns. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 6.00%, he has to spend a one-off amount of Euro 60.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges

DJE LUX - DJE MULTI FLEX

The fund of funds invests primarily in target funds and other securities

Opportunities

- + Maximum flexibility - no restrictions in the choice of investment instruments
- + The selection and weighting of asset classes and securities is based on fundamental, monetary and market analysis - this FMM approach has proven itself for approx. 50 years
- + Asset management character through active risk management

Risks

- Currency risks due to foreign content in the portfolio
- Previously proven investment approach does not guarantee future investment success
- Price risks for bonds, especially in the event of rising interest rates on the capital market
- Share prices can fluctuate relatively strongly due to market conditions

The evaluation of MSCI ESG Research can not be displayed here for legal reasons.

DJE LUX - DJE MULTI FLEX

The fund of funds invests primarily in target funds and other securities

DJE Kapital AG

DJE Kapital AG is part of the DJE Group, can draw on around 50 years of experience in asset management and is today one of the leading bank-independent financial service providers in German-speaking Europe. Our investment strategy, both in equities and bonds, is based on the FMM method developed in-house: a systematic analysis which takes three views on securities and the financial markets – fundamental, monetary and market-technical. DJE follows sustainability criteria when selecting securities, takes into account selected sustainable development goals, avoids or reduces adverse sustainability impacts and is a signatory to the United Nations "Principles for Responsible Investment".

Monthly Commentary

In March, the DJE Lux – DJE Multi Flex gained 3.44%. All target funds held reported positive results in the reporting period. The highest increases came from the gold certificate. Funds investing passively and actively in US and European equities also achieved strong performance. Good results, although less strong, came from the target funds investing in Asia in general and in Japan. The mixed funds held were also able to make a positive contribution to performance. The bond funds held also achieved positive results. The highest growth at bond level came from European corporate bonds.
