The presented charts and tables concerning performance are based on our own calculations according to the gross performance (BVI) method¹ and illustrate past development. Future results may vary both positively and negatively. The BVI method takes into account all costs incurred at the fund level (e.g. management fees), the net performance and the issue fee. Additional individual costs may be incurred at the customer level (e.g. custodian fees, commission and other charges). Model calculation (net): an investor wishes to purchase shares for Euro 1,000. With a maximum issue surcharge of 5.00%, he has to spend a one-off amount of Euro 50.00 when making the purchase. In addition, there may be custodian costs that reduce performance. The custodian costs are decided by your bank's price list and service charges. Information regarding past development is not a reliable indicator of future performance.
